Harry Potter and the Philosopher's Stone

Genre - fantasy

The story is about an 11 year old boy who thinks he is ordinary and also thinks his parents mysteriously die. He is living with his cousin, aunt and uncle who are very mean to him.

The main characters are Harry Potter, Ron, Hermione and Malfoy; my favourite character is Ron.

I love the book because it makes me escape from the real world and it is a good fun book that will hook you on the first page. I don't have anything bad to say about this book and it is very enjoyable to read, even my mum likes it!

I would age rate it for everyone because it is a fun book to read for all ages and gender.

9/10 stars, it's an amazing book.
