

Mariokart 8 is a newer, funnier, cooler version of the original Mariokart made in 2008. This version has gliders, newer versions of the original maps, new things in mystery boxes and so much more. If you don't know what Mariokart is, it's basically a racing game with different Nintendo characters such as Mario, Donkey Kong, Bowser, Princess Peach, Luigi, Zelda, Isabella from animal crossing ... etc. There are 12 robots and you racing at the same time. It's great fun and a great game for the family!

I think that this would be for 3 year olds and over! There's nothing inappropriate it's just very intense.

I rate this a 9.5 out of 10.
