

# Sherburn High School Summer School

# What is our Summer School about?

We are planning a jam-packed week of activities to spark everyone's interests.

We will be developing our literacy and numeracy skills as we delve into practical activities.

We will be building, designing, drawing, moving, exploring and meeting new people.

# What will the days look like?

Each day will have its own theme, which we have shared in the rest of this presentation.

In each day, our new students will need to work together in teams to unlock a puzzle, meet a brief, or explore a new challenge and adventure.

# Monday – Enterprise Day

On Monday, we will create our own businesses.

We will need to work with our companies to create a product, design our brand, build our marketing campaign and take our product to market.

# Tuesday – Detective Day

On Tuesday we will discover our inner Sherlock Holmes.

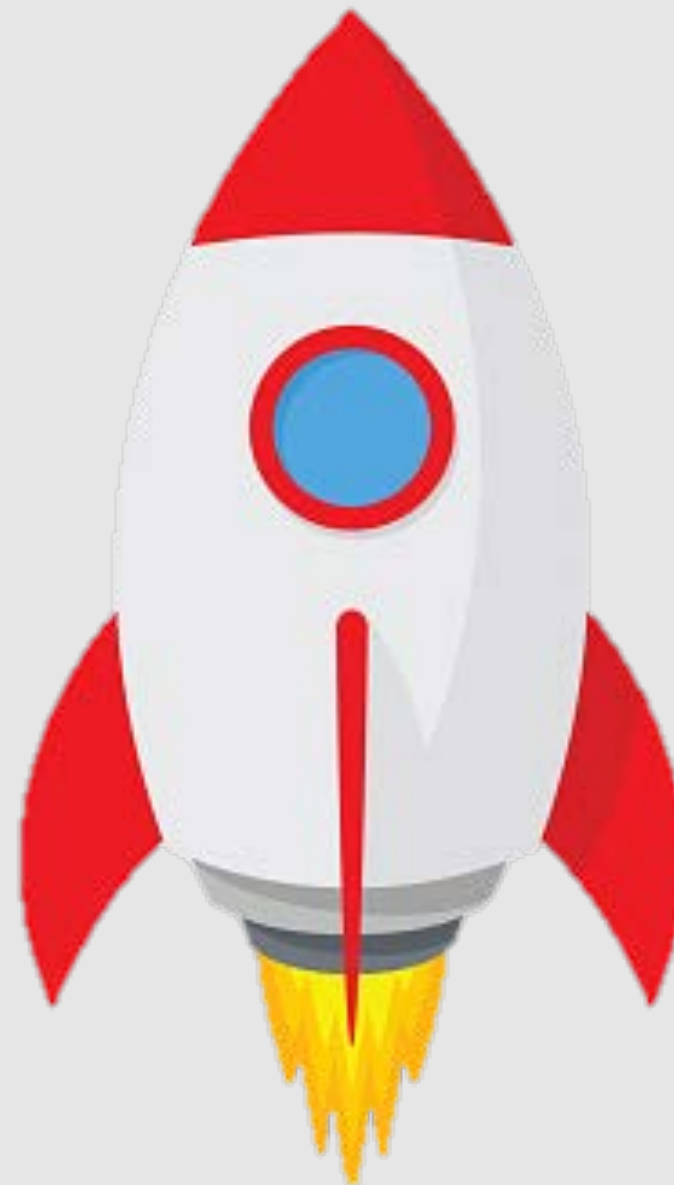

There's a mystery afoot and there's only one team of people that have the skills and the knowledge to solve it!

# Wednesday - Space Day

To infinity and beyond!

We will discover our inner NASA. We explore space travel, rockets and create innovative designs for our own space travel!

# Thursday – Construction Day

The future is in our hands.

Taking our projects from designing to planning to building. We must work in our teams to meet a brief and win the contract!

# Friday – Festival Day

We end the week with our very own Sherburn Festival!

In the afternoon we will invite families to come and see what we've been up to over the week with a treat or two too!
