Grand Theft Auto V – Rockstar Games

Genre – Crime/Mystery

GTA is about crime and sometimes roleplay. The storyline is about three friends named Franklin, Michael and Trevor. Franklin is a gang member who usually hangs out with his friend Lamar. Michael was a convict and after his release got married and became a multi-millionaire. Trevor is a past drug addict and a psychotic character and something bad happens to him.

There is also another mode you can play called GTA Online where you can buy cars, own properties and work in businesses.

I would recommend getting this game but only if your parents are okay with violent games!

I rate this game 10 out of 10.
